Dr. Dercum Says Wilson's Condition Is Grave

(By Associated Press)

Philadelphia, Oct. 3.—Dr. Dercum, of this city, who examined President Wilson as consulting physician, said today "the President's condition is grave," but that he is of a cheerful frame of mind. The President is profoundly exhausted and very weak, said Dr. Dercum. He said: "He was up and about on Wednesday and became so completely exhausted later it caused every one to be a little apprehensive." Dr. Dercum said he would not return to Washington unless summoned.

Quite So.

"SMELLERS" ABOUT THRU THEIR "WORK"

Representatives' select committee to investigate war expenditures popularly known as the "smellers" has delved into the problem of how, and why, a Democratic administration won the greatest war of history. Bands of sub-"smellers" have journeyed to the Pacific coast, to camps and cantonments and to France in a search for campaign material for the G. O. P.

And what is the official result? The probability that most of the sub-committees will not turn in their reports for six months. That would be March, or about three months before the holding of the Republican convention. There is little likelihood, however, that the Democratic leaders will permit any such delay, so far as their protests can carry. Consequently much of the information will likely come out in debate on the floor of the House long before that time.

The country still recalls the defeat administered to the sub-committee on foreign expenditures at Paris in their attempt to "smell" General Pershing on the day before he sailed for America. It is unjust to attribute this defeat to all the sub-"smellers" as the Democratic member, Henry D. Johnson, of South Dakota, and his Republican colleague, Oscar E. Bland of Indiana monopolizing that feature.

Johnson and Bland arrived in Paris on Aug. 15, and two weeks later, Aug. 28, called on General Pershing for information to be given the following day. They were well aware at the time of their arrival of the approximate date of the American commander's date of departure, and later knew that Aug. 30 had been fixed as the time.

When they called upon the General at his headquarters the members of the committee were informed by General Pershing that all his documents, records, etc., were either at Brest or in the hold of the "Leviathan," and that he did not want to make any important statement without being able to refer to them. That did not satisfy Representatives Bland who insisted upon "examining" the soldier. That settled it for Pershing and he flatly refused to answer, saying he would be available on his return to the United States, when, with his records in hand, he be glad to reply to all questions. For this he was denounced in cablegrams by Johnson and Bland over-riding Congressional authority, etc.

As in the cases of the other sub-committees, the French explorers failed to uncover the expected campaign material, and their methods have excited the derision and denunciation of several of their own party organs. As Representatives Flood a Congressman of many terms, put it: "There was nothing in the evidence that would appeal to any reasoning mind as justification for the criticism by the Republican members of the sub-committee."

Representative Bland in the various statements he has given out since his arrival in the United States drew particular attention to the disposal of property for \$400,000,000 which he valued at \$1,700,000,000. He neglected to state that much of this property cost the United States nothing, having been captured from the Germans. A commission consisting of ex-Senator Hollis of New Hampshire; Gen. Charles G. Dawes of Chicago, and ex-Judge Parker of Texas, valued this property at one billion dollars. Of this amount \$200,000,000 worth was disposed of to other nations, and the remainder sold to the French government for \$400,000,000 under a blanket contract, the French assuming all American liabilities in connection with the occupation of more than 155,000 tracts of land, and also agreeing to feed and generally support all American troops during the entire time they remained in France. It must also be remembered that much of the property sold to the French consisted of buildings which could not be otherwise successfully or profitably disposed of.

There was some irony in the situation of the sub-"smellers" because the automobile in which they surveyed France belonged to that country by purchase from the United States, likewise the gasoline that furnished the motive power.

Another sub-committee that has been much in the public eye because of the methods of its chairman, Jas. A. Frear, of Wisconsin, Republican, was that investigating aviation. The other members were Walter W. Magee, of New York, Republican, and Clarence F. Lea, of California, Democrat.

Representative Lea expressed the public idea of this committee as reflected in newspapers and other periodicals of both parties when he said, on his return to Washington:

"The attitude of Chairman Frear in conducting the spruce investigation on the Pacific coast was a disgrace to Congress. I do not for a moment believe the Republican members of the House of Representatives approve of the browbeating methods used by Mr. Frear."

It will be remembered that Frear wired to Washington a denunciation of John D. Ryan, of New York, when the evidence that Frear would not admit but which was subsequently learned by the public, proved that Mr. Ryan had nothing whatever to do with the railroad construction cited.

Such an influential Pacific coast newspaper as the "Portland Journal," independent, denounced the Frear treatment of witnesses, calling his manner "That of a thickened police court lawyer," and saying that he brought "the great American House of Representatives down to the level of a kangaroo court."

Also "the chairman (Frear) bullied, badgered and insulted General Disque because of the latter's activity in establishing the eight hour day in the camps and mills," and added that "chairman's efforts to smear men's reputations and taint their good
